Studying in Style

parinfurniture.com

Modern learning environments must foster the good interpersonal connections necessary for effective learning, both formal and informal, and must fit the individual learning needs of each student. They should be student-centered, technologically advanced environments that promote both solitary and collaborative learning, support creativity, and create a sense of community.

21st Century Learning Spaces

ADAPTABLE

Build flexible learning environments that can accommodate various learning modalities. Working in both ME and WE modes

SMART

Technology supports students' individualised learning, fosters their curiosity, and enhances experiences. Physical and digital education work best together to improve engagement and conceptual understanding.

INVITING

Increases creativity by converting a "boring, limiting, scary" space into one that is "inviting, soothing, and exhilarating" through the instillation of a sense of curiosity and contemporary offerings.

COMFORTABLE

Keeps up with the users' energy levels, growth, and ergonomic needs to increase wellbeing and concentration.

SAFE

Lowers the risk of physical harm in classrooms and assures better air quality inside. A safer and healthier learning environment will be produced by incorporating approved designs with low VOC emissions into the learning space.

INTRODUCING
**NEW-AGE
LEARNING
SPACES**

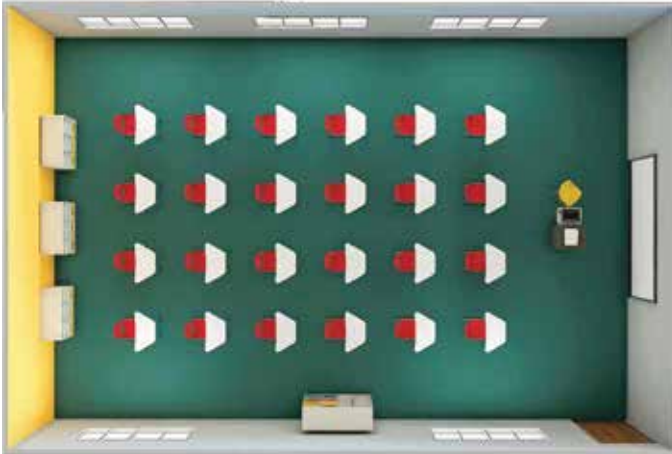

That are adaptable, inviting, intelligent, comfortable, and secure. They promote holistic growth by offering 'intuitive, calming, and revitalising' items.

Parin's Education line is a collection of goods for classrooms, activity areas, and other educational environments. The range's aesthetic harmony and practicality comprise a variety of goods such as desks, storage, and chairs to complete the environment solutions across school interior spaces.

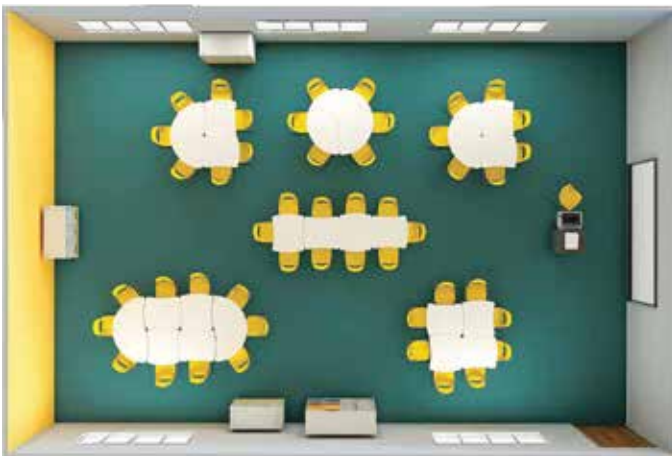

This series is designed to support diverse learning methods and offers ME and WE areas, giving you additional options and allowing you to easily adjust and adapt to current requirements.-----

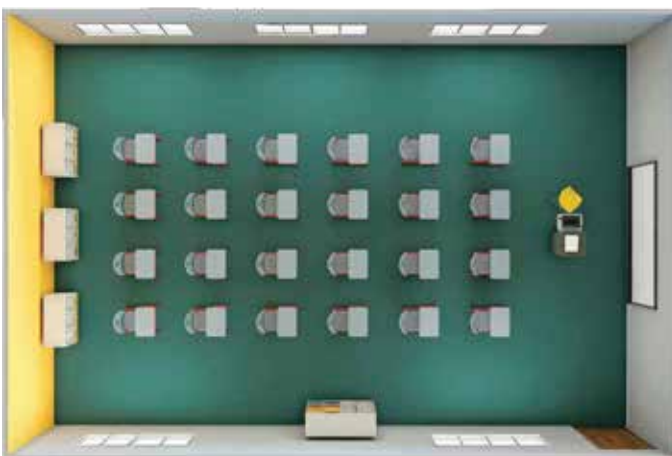

Unique designs enable you to construct both traditional and activity-based group configurations. This promotes a collaborative learning environment.

ACTIVITY DESKS

According to a survey done by the Parin Workspace Research Center, 94% of instructors who can modify their layout feel they can teach well, compared to 40.5% of teachers who can teach effectively but can't change their layout.

Based on the needs, Activity Desks provide a variety of learning applications such as ME space and WE space. A range of customizable designs enable smooth transitions from lecture mode to collaborative mode to group presentation and discussion mode.

The Activity desks come in two styles: Boomerang & Hex and Pie & Flag. They are portable and lightweight, making it simple to generate numerous configurations.
